Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Ichikawa et al. Ichikawa et al teaches a lens having a first lens surface and a second lens surface wherein the first lens surface has a convex surface (Figure 1B, element 12), a flange formed around the lens and projected in the radial direction perpendicular to an optical axis and continuous with the convex surface (Figure 1B, element 14) wherein the flange has a groove formed therein (Figure 1B, element 17) as claimed in independent claim 1 (column 7, lines 22-34). Ichikawa et al also teaches the groove width in the tangential direction as being larger than the width of the flange in the radial direction (Figure 8) as claimed in dependent claim 7.

Allowable Subject Matter

Claims 2-6 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the independent claims, in such a manner that a rejection under 35 U.S.C. 102 or

Art Unit: 2873

103 would be proper. Although the prior art teaches a lens having a flange formed around a lens and having a groove formed therein as claimed in independent claim 1 of the instant invention, the prior art fails to teach the groove as being formed in an outer and inner ring areas as claimed in dependent claim 2 of the instant invention.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yamada et al, Kanazawa et al and Aria et al teach lens elements having a flange.
